# Place Order: Market Order By Stop Price (Part 4)

After submitting your confirmed order, you will be shown the Order Result Screen where your order is being submitted to the Exchange.

When your order is successful, the following message appears

**Important Note:**  
Upon placing your order, check Order Book for updated status and to ensure the order has been successfully placed to the relevant exchange.

# Place Order: Sell Trailing Stop Order (Part 1)

A sell trailing stop order allows you to sell a security if it moves in an unfavorable direction. The stop loss price is not set at a single, absolute price, but instead is set at a certain percentage or a certain dollar amount below the market price.

As the market price increases, the stop price rises by the trail amount or percentage. However, the stop price will remain the same when the market price decreases. If the market price reaches a new high, the stop price will resume rising by the trail amount or percentage. However, if the market price falls to or below the stop price, the Sell Trailing Order is triggered and a market order is submitted.

The screenshot shows the 'Place Order' window with the following details:

- Account: (Cash) Limit
- Exchange: NASDAQ
- Stock Name/Code: AMD.O
- Market Data Table:

Name	ADV MICRO DEVICE	+/-	+0.120	Last	12.17
