Your order has been accepted by the system and will be submitted to the Exchange. The order may be subject to further checks by the Exchange and could still be Rejected. Please check Order Book for the updated status.

OK

When your order is successful, the following message appears

Important Note:
Upon placing your order, check Order Book for updated status and to ensure the order has been successfully placed to the relevant exchange.

Place Order: Market Order By Stop Price (Part 1)

A market order is entered with a quantity but without a price and it will be traded at the best price currently available in the market. Please use extreme caution when using a market order as a lack of liquidity may result in an extremely adverse filled price.

When your order is successful, the following message appears

Important Note:

Upon placing your order, check Order Book for updated status and to ensure the order has been successfully placed to the relevant exchange.

Place Order: Sell Trailing Stop Order (Part 1)

A sell trailing stop order allows you to sell a security if it moves in an unfavorable direction. The stop loss price is not set at a single, absolute price, but instead is set at a certain percentage or a certain dollar amount below the market price. As the market price increases, the stop price rises by the trail amount or percentage. However, the stop price will remain the same when the market price decreases. If the market price reaches a new high, the stop price will resume rising by the trail amount or percentage. When the market price hits or passes through the stop price, the Sell Trailing Stop Order is triggered and a market order is submitted. As market orders will be executed at the best prevailing bid price, you are advised to exercise caution for illiquid counters as your orders may be filled at an unfavourable price.
